

# Alpha Card Photo ID Software

With Alpha Card software you can design, print and manage ID cards and badges for any professional ID application.

As the premiere solution for ID card production and data management, Alpha Card combines user-friendly design and automation tools with a sophisticated platform for storing and organizing records.

Whether you're implementing a basic photo ID program, or issuing multifunctional ID badges across a large-scale operation, Alpha Card Photo ID Software provides you with the necessary tools to achieve your goals. The software is available in three different editions.

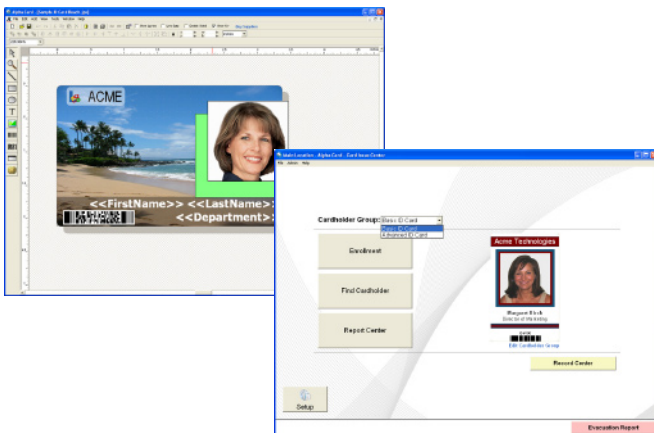

## Standard edition

The perfect entry-level solution for organizations with independent users and locations.

### Highlights:

- Advanced card design tools
- Multiple templates and unlimited data fields
- Connect to file-based data sources (no need to re-enter your data)
- User-friendly Card Issue Center interface
- Stand-alone solution: Perfect for single user

## Professional edition

Ideal for organizations with multiple users requiring centralized data.

### Highlights:

- Live database connectivity (ODBC compliant)
- Centralized data management
- Customizable record screen layouts
- Secure user authorization
- Connectivity with SQL Server and Oracle

## Enterprise edition

The advanced solution for large-scale organizations looking to implement secure and sophisticated ID card programs across multiple sites.

### Highlights:

- Centralized data management and secure network operation
- Custom drop-down lists
- Definable user login accounts
- Digital key encryption
- Secure watermarks
- Batch printing and command line interface
